Beth:

I could not sign one of these as it was protected and asked for a password. I would prefer to sign it electronically but maybe Leroy can print it then I can sign it then Leroy can send it to both of us as an electronic document.

Also, we need something in the document that indicates that the compounds 2,4-Dinitrotoluene and Hexachlorobenzene could not be resolved by the TCLP analysis but the totals analysis show the compounds are below the TCLP level.

Thanks

Subject: FT1002 Profile for Lonestar

Gary,

Attached is the profile for wastestream FT1002. Please sign and return both documents (note the Ecoserv profile has three tabs) and we'll get this in for approvals ASAP. Based on bid analysis received and reviewed this material will ship to Lonestar Ecology at .20/gallon for a total of approximately \$5200 T&D. Due to Lonestar's pretreatment standards they will be passing this material onto Newpark for final disposal. We did solicit direct pricing from Newpark however they chose to submit a No Bid. Please call or email with questions.

Thanks,

Beth Crawford
